Steel for the reinforcement of concrete B500A: bars

PRODUCT SPECIFICATION

General

Steel for the reinforcement of concrete B500A (welded fabric and bars) are in accordance with the requirements of chapter 4 of guideline BRL 0501 and with that of NEN 6008.

The product is meant to be used in constructions of concrete.

Classification : B500A
 Production method : Cold profiled
 Nominal size : 6 – 8 – 10 and 12 mm
 Delivery condition : bars

The quality mark B500A fulfils the requirements of the old quality mark FeB500 HKN.

Marking

The products are marked with a label with upon it at least on a clear and indelible way:

- the KOMO[®]-logo and the certificate number, figure 1;
- the classification B500A;
- the diameter (combination);
- the rolling mark;
- heatnumber/castnumber/productionnumber;
- name of the certificate holder
- BRL 0501.

Place of the label: at least one label per package of bars.

Steel for the reinforcement of concrete is marked on the following way:

On one rib row by stuffings between two ribs with the code (1-31), figure 2

Place of the mark: on a mutual distance of $\pm 0,50$ meter. The position of the transverse ribs may also be in reverse.

RECOMMENDATIONS FOR USERS

Check at the time of delivery whether:

- the producer has delivered in conformity with the agreement;
- the mark and marking method are correct;
- the products do not show any visible defects due to transport.

If you should reject a product on the basis of the above, please contact:

- Fenne Stahl GmbH
- and if necessary:
- Kiwa Nederland B.V.

Consult for the proper method of storage and transport NEN 6722 and/or NEN-EN 13670.
